

FL 200/260 (T)

The versatile, automatically tensioned overhead contact line system for speeds of up to 260 km/h

Our FL 200/260 (T) is a versatile, automatically tensioned overhead contact line system with tubular hinged cantilevers that is suitable for both DC and AC systems and offers lightweight, corrosion-resistant components and installation-friendly geometries. The automatically tensioned design balances out temperature fluctuations and reduces sag in the contact wires, ensuring spark-free current collection even at high speeds. The system is widely used on open tracks, on curved sections, and in tunnels.

About Furrer+Frey

We have been helping to shape public transport world-wide since 1923. Our portfolio includes overhead contact line systems, railway control systems, design tools, and charging stations for battery trains. Close collaboration with our customers drives us to constantly develop new and sustainable solutions.

Innovation for tomorrow – this is our ambition and our motivation.
