

LIGHT RAIL StB-FL 100

The versatile and flexible overhead contact line system for urban transport solutions

Our StB-FL 100 light rail system is a flexible and versatile solution intended specifically for urban transport such as light rail vehicles, trams, and trolleybuses. Designed for a maximum DC voltage of 1,500 V and speeds of up to 100 km/h, it is a customised high-performance solution for the electrification of public transport networks. The StB-FL 100 enables various overhead contact line designs that blend harmoniously into existing surroundings.

Find out more about the StB-FL 100 light rail system on our website:

About Furrer+Frey

We have been helping to shape public transport worldwide since 1923. Our portfolio includes overhead contact line systems, railway control systems, design tools, and charging stations for battery trains. Close collaboration with our customers drives us to constantly develop new and sustainable solutions.

Innovation for tomorrow – this is our ambition and our motivation.
