Work smart - choose ELFF

Kind Reader, at Furrer+Frey we started the new year 2018 with the first release of a new design range of our ELFF software. I am proud to be able to announce the availability of ELFF UKMS, ready for clients' use. Hundreds of man-hours have been invested in the development of the first ELFF UKMS release. We are now able to allocate a vast variety of UKMS elements using the ELFF software.

Taking automated OLE design to the next level, one of the ELFF UKMS key strengths will again lie in its level of detail and the fact that it can be used in a real world environment. Not only on open route sections but also in very complex areas such as platforms, crossings, low overbridges and many more ELFF will support the designer in his daily business. With the new Excel spread sheet function it is possible to allocate two complete wireruns including a material list and a rendered 3D model in less than 10 minutes.

If that's not cool, what else is? 😎

 For more information regarding ELFF-UKMS and to answer any other ELFF request, please contact us by email at gb@furrerfrey.co.uk

To our clients and the ELFF users

I would like to let you know that I am leaving Furrer+Frey at the end of this month. Please do not hesitate to reach out with any questions and rest assured that I will do everything I can to make this a smooth transition until my last day with Furrer+Frey.

With this newsletter I would like to take the opportunity to thank you for a great business relationship during my time here at Furrer+Frey. It has always been a pleasure to work with you and I hope that I will meet some of you again, somehow, somewhere. I am very grateful for five wonderful years at Furrer+Frey and will never forget my time in the OLE industry.

Your contacts going forward:

- + For technical support:
ELFF Team ELFFsupport@furrerfrey.ch
- + For existing licence administration:
Rebecca Heiërman rheierman@furrerfrey.ch
- + For new licences:
Caroline Bacher cbacher@furrerfrey.ch
Noel Dolphin ndolphin@furrerfrey.ch.

Sincerely yours,
Martin
