

## Health and Safety Policy Statement

---

### Health and Safety Policy Statement

Safety is central to everything we do as a business, and is something we absolutely do not compromise on. One accident is one too many and so if a task is not safe do not do it.

We make sure safety is central to our business by:

**Being Open and Honest:** Sharing information and reporting any safety issues whatsoever. We actively train, instruct and inform.

**Prevention and Targets:** We identify health and safety risks at an early stage. Health and safety are already integral parts of Furrer+Frey design and construction planning. Our target is zero accidents.

**Leadership and working with Others:** Taking our own safety seriously, as managers and colleagues, and that of those around us.

**Embracing Safety:** Safety is good business sense.

**Requirements and processes:** We strictly adhere to any legal and other requirements with regards to occupational health and safety. We make sure our procedures are uncomplicated and everyone understands them.

**Continuous improvement:** We constantly improve health and safety at work, for ourselves and others; for example customers and the travelling public.

**Trusting our Instincts:** If something does not feel right, stop the work and speak up.

Noel Dolphin  
Director Furrer+Frey
